

WASHINGTON PARK

CLIENT

3CDC and
Cincinnati Park Board

LOCATION

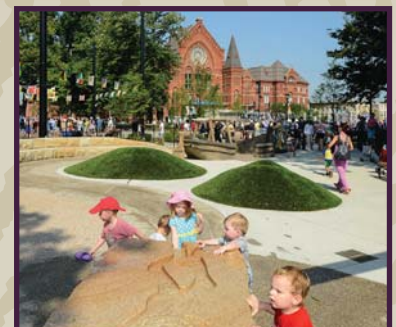

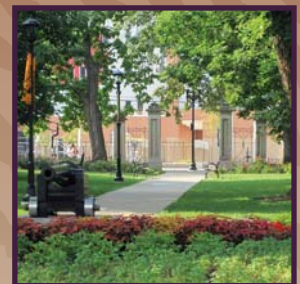

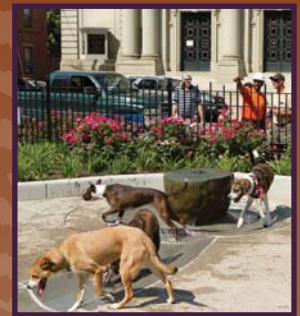

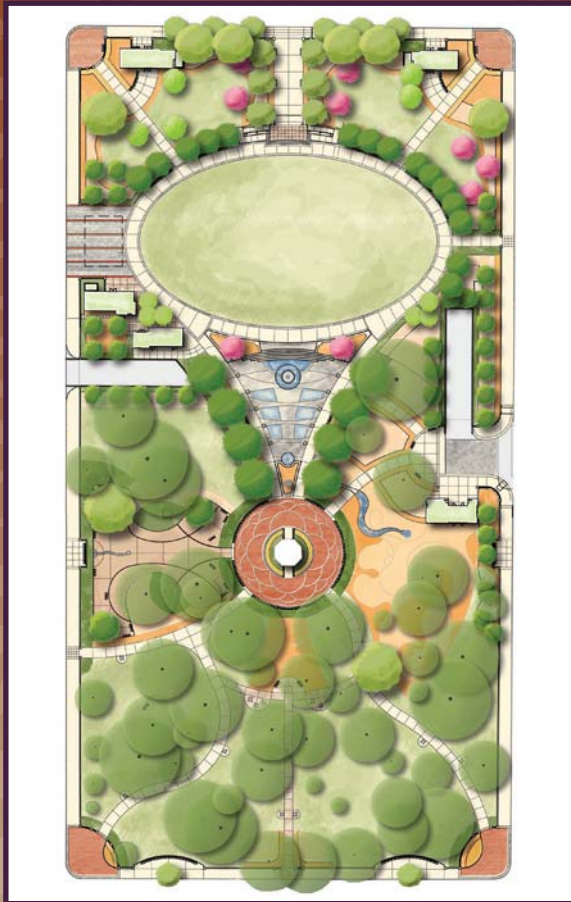

Cincinnati, OH

PROJECT PHASE

Master Plan and
Implementation

DESCRIPTION

Human Nature collaborated with a multidisciplinary team to develop a new master plan for Washington Park, one of Cincinnati's oldest public parks located in a rapidly redeveloping historic neighborhood. The design team worked with the client team, local stakeholder organizations, and community participants to craft a park vision that acknowledges the historic surroundings, while providing new and contemporary amenities for residents and visitors. The proposed plan preserves as many of the existing large trees as possible and recommends several new improvements, including an oval lawn for civic events and concerts, a dog park, gardens, a concessions stand, an interactive fountain, a custom play environment, multiple picnicking opportunities, and park gateways. The plan addresses the complex needs and values of a diverse and active community. The design team continued work through implementation, with Human Nature serving as Park Designer and Landscape Architect.
